

GENERAL STATS ABOUT THE SURVEY PARTICIPANTS

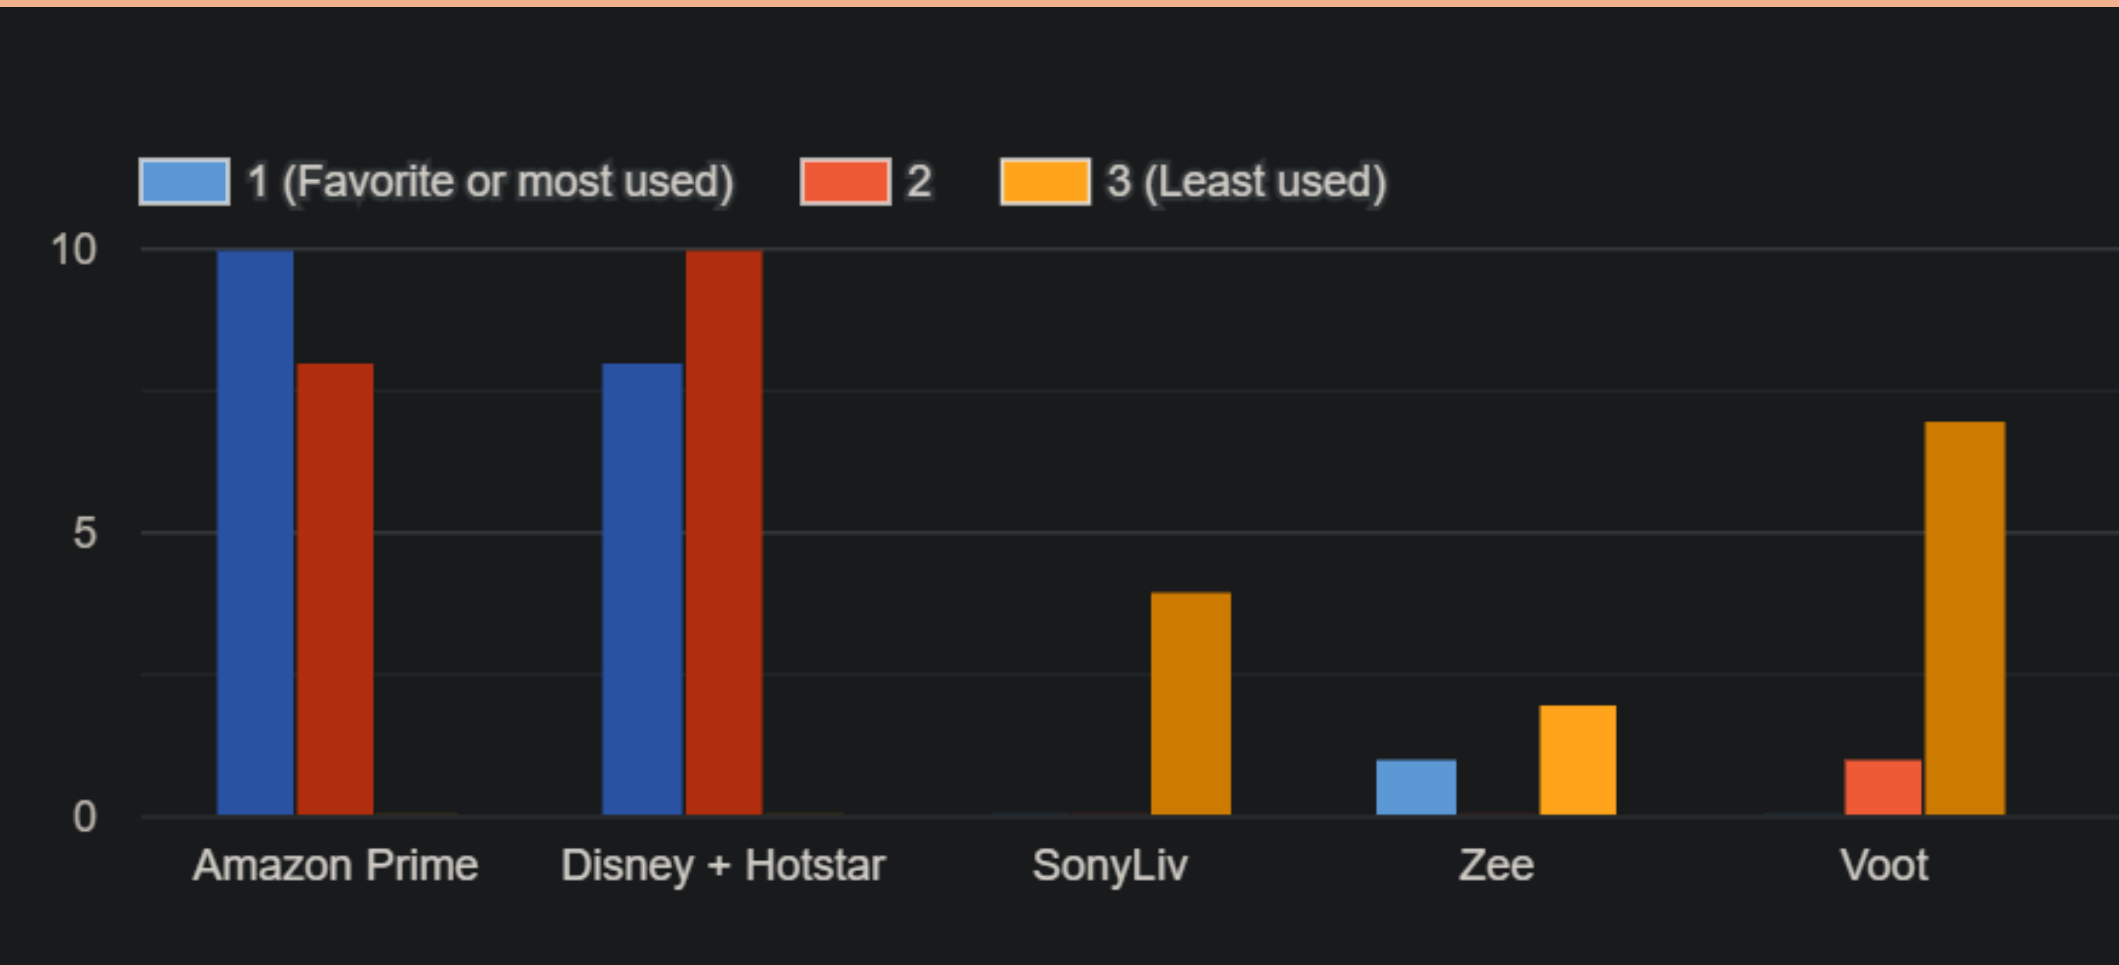

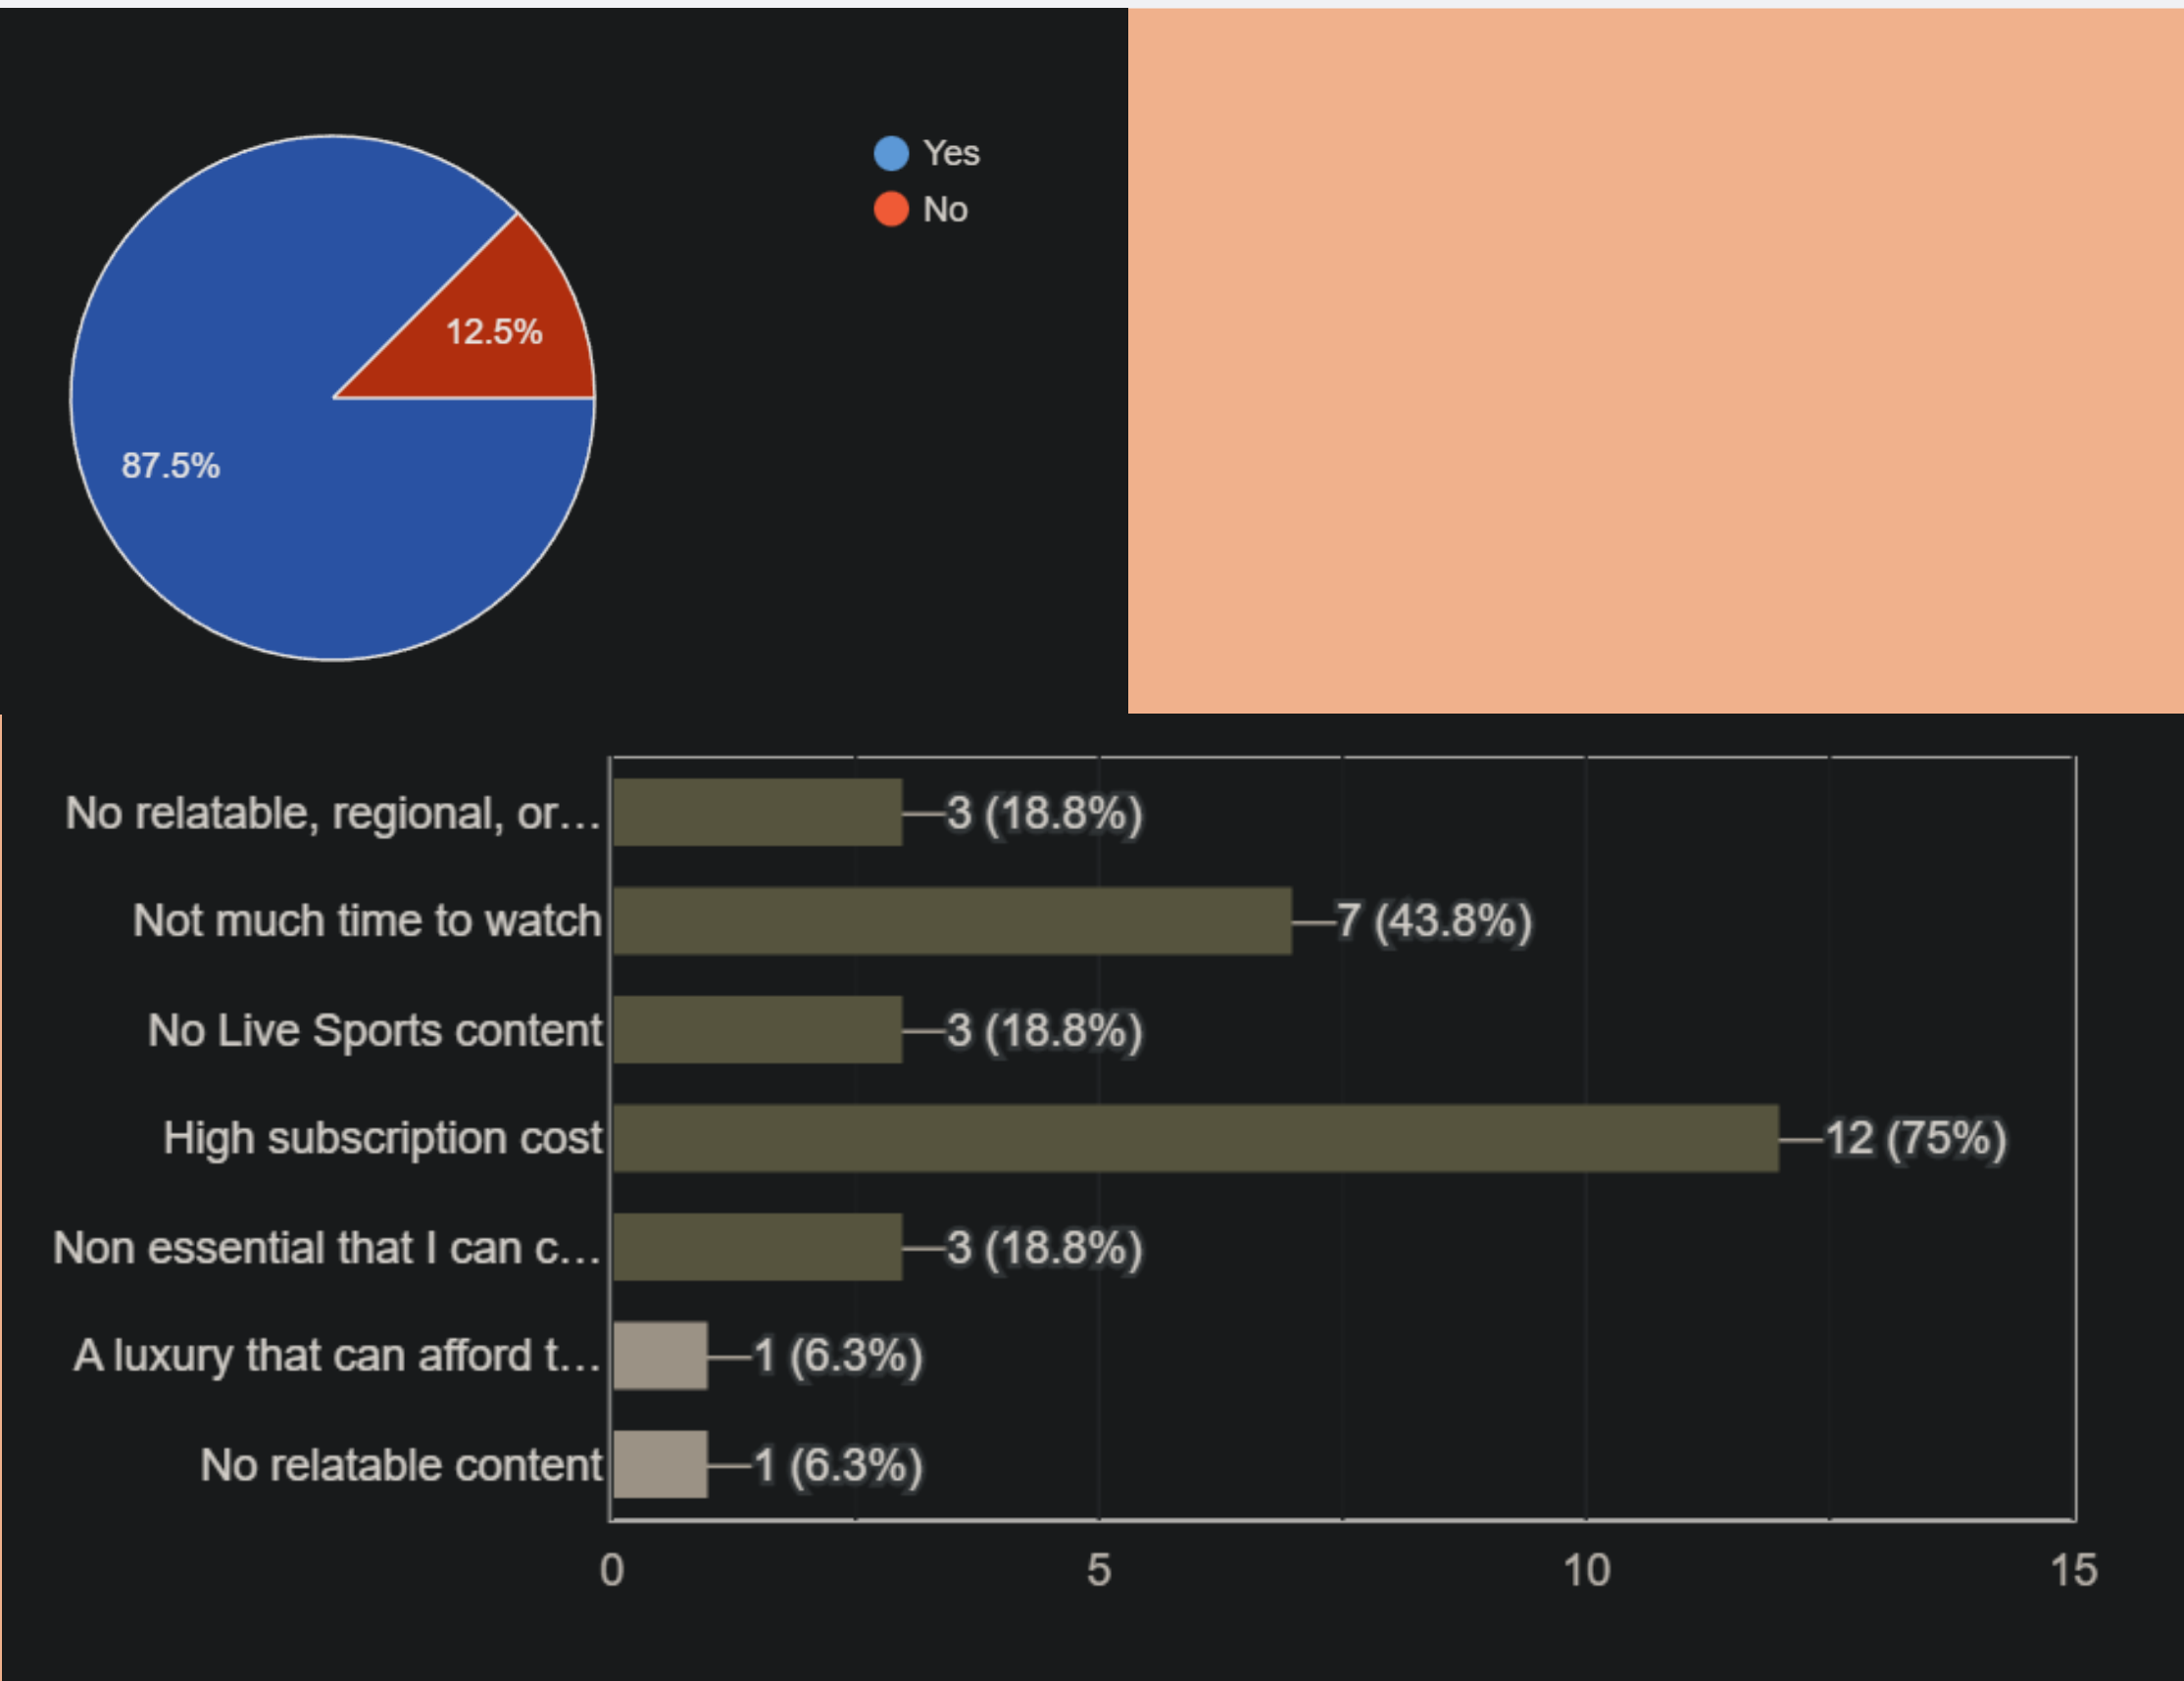

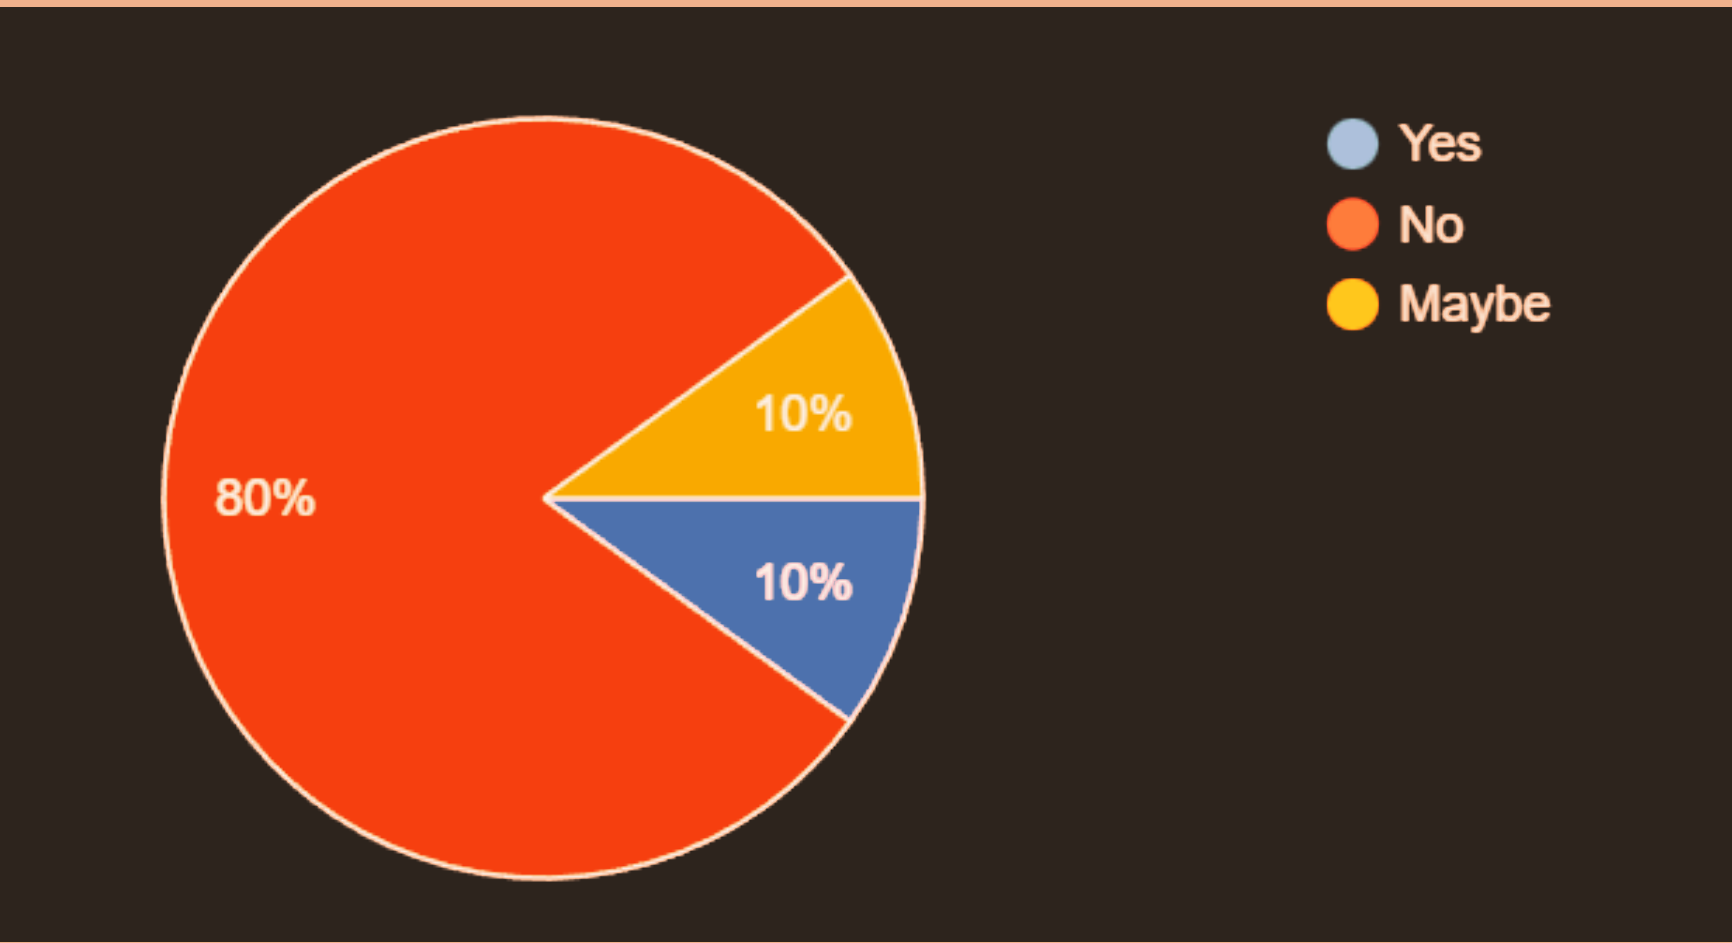

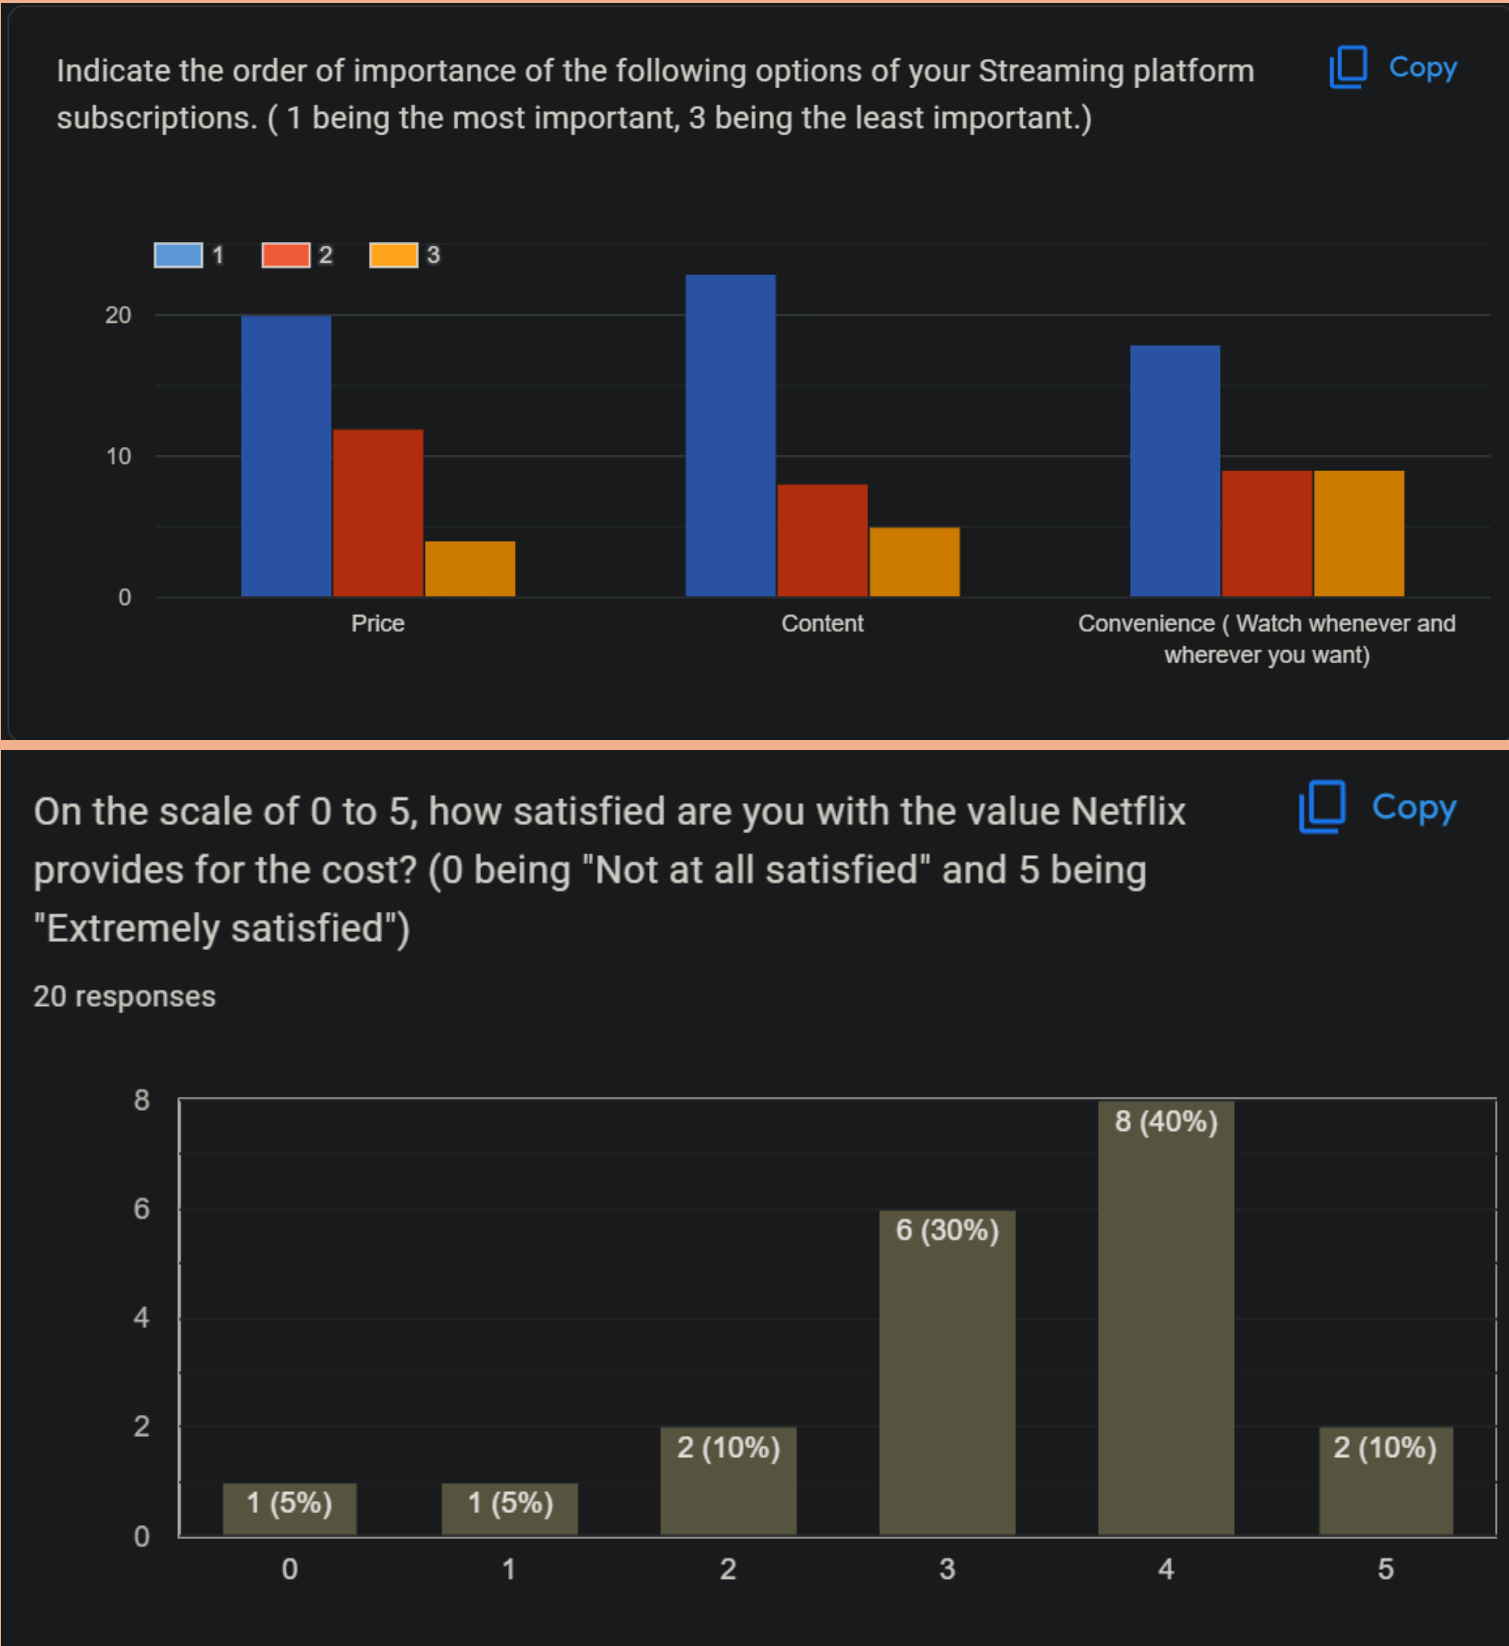

REASONS FOR DROP IN NET USER GROWTH FOR NETFLIX

GENERAL STATS ABOUT THE SURVEY PARTICIPANTS

LACK OF TIME TO WATCH

HIGH SUBSCRIPTION COST

STIFF COMPETITION FROM AMAZON PRIME AND DISNEY + HOTSTAR

- 7:3 male to female ratio
- 55%, 20% 25% - have, had, and don't have a Netflix subscription
- Price and Content score equal weightage, but they outweigh convenience by a slight margin. we can infer that people are willing to spend money for convenience and content.
- People like Netflix more for it's new original trendy content.
- 90% of the existing users watch content that is popular among their circle.
- 90% of the existing users are very satisfied with the value Netflix provides for the cost.

80% of the people are spending less time on Netflix now than during the pandemic. This might be due to the overdose of ott content during the pandemic.

- High subscription cost is a deterrent for 75% of non users.
- 44% say that it doesn't contain relatable content.
- Since 90% of these users have other subscriptions, We can infer that they have enough exciting content on with other subscription (either in form of live sports or regional or relatable content), so they don't see value in Netflix offerings. Hence they think of it as a non essential.

- The competition from Prime videos and Disney + Hotstar is high. these number are for those who already have Netflix and as mentioned in the people previous section, 90% of the non-Netflix users have other subscriptions. this indicates the fact that people are looking for more regional and sports content that these other subscriptions offer.
