EDUCATION

FOSTER SCHOOL OF BUSINESS, UNIVERSITY OF WASHINGTON, Seattle, WA

Mar 2026

Master of Business Administration (MBA), Management Science (STEM), VP of Foster Tech Club & AI Product Builder

- Architected a cost and time-efficient '[AI Hike Researcher](#)', an agentic skill, that automates real-time data gathering across 6 safety-critical dimensions, reducing weekly planning time by 98% through staged research and personalized filtering.
- Built a GenAI music recommendation engine in n8n for mood/occasion sub-playlist curation, using dynamic song-feature selection; improved relevance by 73% versus a rule-based baseline in project testing.
- Discovered student wellness pain points through 6 customer interviews, synthesized unmet needs, and built a [behavioral psychology-informed prototype](#) in 3 hours at the OpenAI Codex Hackathon.
- Benchmarked Asana's Sales Strategy and GTM across 9 dimension and recommended better PLG vs. SLG guidance and competitive differentiation; awarded [1st place](#) for best assessment out of 8 teams.
- Led an 11-member [cross-functional team](#) (Design/Eng/Biz) to build [HeyLily](#) (Hiya competitor), a GenAI scam-call assistant for seniors; ran 15+ user interviews; guided dev team in building an android call app; crafted a 5-year B2B2C GTM model.
- Launched a new 'Product Teardown' series to deconstruct world class products, producing 3 events with [110+ attendees](#).

NEXTLEAP PRODUCT MANAGEMENT FELLOWSHIP, Bangalore, India

Feb 2023

- [Analyzed 100 1-star ratings of Bumble](#) on app store & root caused "No matches"; brainstormed solutions and proposed "Bumble Barney", a GenAI Wingman, to decrease "No Matches" by 10%, winning [2nd rank in Feb Capstone project](#).

PES University, Bangalore, India

June 2018

Bachelor of Engineering, Computer Science, 9.5 CGPA, Top 5% of the class

EXPERIENCE

AMAZON WEB SERVICES, Seattle, WA

Jun – Sep 2025

Senior Product Manager Technical - External Services Intern, L6, AWS FinOps

- Authored a 19-page strategy narrative for AWS FinOps Cost Optimization by synthesizing insights from 45 field (TAMs & SAs) interviews, 100+ feature requests (PFRs), and 1000+ support tickets on AWS re:post for top 8 services.
- Prioritized 6 cost-saving features using an Effort-Risk-Savings framework to inform the 2026 roadmap.
- Conducted 10 customer interviews (BMW, Salesforce, PBS, etc.) to derive insights on FinOps practices and challenges to formulate a PRFAQ (PRD) doc for 3 rigorously scoped S3 cost-optimization features that provide up to 40% savings.
- Built a dependency-aware roadmap prioritizing 8 additional features across need, engineering effort, and risks.

MICROSOFT, Bangalore, India

Jul 2018 – Jul 2024

Software Engineer 2, L62, Azure Storage, Migrate, & Monitor

- Spearheaded the 0-to-1 development and launch of the [Windows CLI client](#) (WSL2 virtualization) for Blob NFS, unlocking a new Windows segment and onboarding 150+ B2B customers; partnered with Product leadership on [GTM strategy](#).
- Directed a team of 4 engineers to build 'AIOnCall,' a GenAI workflow that automated E2E incident diagnosis. Reduced on-call diagnosis effort by 85%, winning 1st Place among 15 team in the Azure Storage Hackathon.
- Designed the UX for the Action Rules feature that increased CSAT from 62% to 89%; reduced the page load time by 80% via component redesign and lazy loading in a Typescript framework, earned the 'Customer Obsession' award.
- Developed a novel distributed cache and purging algorithm, derived using ML, to improve the cache space efficiency by 5x, driving a 30% increase in adoption among HPC customers. Earned the 'Quality Champ' title among 400+ peers.
- Reduced the cost of Azure Cosmos DB by 45% for a write heavy workload to distribute load effectively across partitions.
- Modernized the compute fleet by migrating to Service Fabric orchestrator platform (Microsoft's Kubernetes alternative), improving availability by 3x (Availability zones) while reducing the compute cost by ~53% for better Disaster Recovery.
- Unlocked \$1M+ in new revenue by delivering high-throughput (1TBps) storage infrastructure for HPC workloads. Orchestrated delivery across 4 global engineering teams, scaling system capacity by 8x to meet enterprise requirements.
- Built a performance testing tool capable of 3TBps throughput & 200k IOPS, reducing testing time by 83% & cost by 70%.

SKILLS & TOOLS

- Skills: User & Market research, Cross functional collaboration, UI/UX, Design thinking, Prototyping, Gen AI & ML, FinOps, DevOps, Competitive Analysis, Product Strategy, Metric-driven Prioritization, Go-to-market, Agile, CI/CD, Virtualization, Workflow automation, Developer Experience, Technical Roadmap, Database Engine optimization, KPI, API
- Tools: Claude Code, LLM & RAG, Figma, Canva, Tableau/Power BI, AWS, Azure, Java, Python, SQL, NoSQL, CLI, DevTools
